XM Satellite Radio...why did I decide to purchase this service in the first place? First of all, it gives me the choices that I want to listen to without interruption from outside sources. No one tells me what to listen to and I get to listen to a ton of choices that isn't offered any where else...not one city gives me the freedom that XM does. Second of all, if I need to know the weather and driving conditions of the highlighted cities that XM offers, which I frequently do, then I should be able to receive those incredibly helpful channels without government intervention. The city of Richmond where I am from is a victim of government intervention and look where it has gotten this city since the seventies...in the headlines for the most murders per capita. Way to go government intervention...appreciate the help! Stay out of my XM. Stay out of XM's way period. Let the listeners decide what we want to hear.
